PROFESSIONAL SUMMARY

IT graduate specializing in network security and infrastructure, with hands-on experience in NSOC monitoring, firewall management, and enterprise network troubleshooting. Skilled in securing systems, controlling access, and hardening infrastructure across corporate and academic environments. Seeking full-time opportunities in network security operations, cybersecurity, or IT infrastructure.

WORK EXPERIENCE

Network Security (NSOC) Intern

May 2026 – Present

Malomatia

- Monitor network security events and alerts within the Network Security Operations Center (NSOC) environment.
- Assist with firewall management, network device configuration, and continuous security monitoring.
- Support incident analysis, network troubleshooting, and day-to-day infrastructure operations.

Technical Intern Networking & Cybersecurity

May 2026

Cisco Networking Academy

- Completed structured technical training in networking, cybersecurity, and enterprise IT concepts.
- Gained direct exposure to Cisco networking technologies and industry-standard network operational practices.
- Completed hands-on exercises in network infrastructure configuration, troubleshooting, and core security concepts.
- Built foundational understanding of enterprise networking environments and professional IT/network operations workflows.

Student Assistant

Jan 2026 – Mar 2026

University of Doha for Science and Technology (UDST)

- Administered IT systems, databases, and platforms, enforcing access controls and data integrity to reduce unauthorized-access risk.
- Provided technical support and troubleshooting for system, network, and user issues, escalating security-relevant incidents where required.
- Monitored IT operations and system logs to identify irregular activity and support secure, reliable infrastructure operation.

Website Designer

Mar 2025 – Aug 2025

University of Doha for Science and Technology (UDST)

- Managed web hosting, server configuration, and deployment while applying security best practices to protect against common web vulnerabilities.
- Collaborated on backend improvements and access-control logic to strengthen application and system security.
- Ensured system reliability, uptime, and adherence to network and application security best practices.

Peer Tutor

Dec 2024 – Dec 2025

University of Doha for Science and Technology (UDST)

- Delivered hands-on training in networking, network security fundamentals, and IT infrastructure concepts.
- Guided students through network simulations, secure system configurations, and troubleshooting of connectivity and access issues.
- Taught use of Cisco Packet Tracer for network design and segmentation, reinforcing core networking and security principles.

Exhibition Coordinator

May 2023 – Aug 2023

National Museum of Qatar (NMOQ)

- Supported and secured event IT infrastructure, including network connectivity and AV systems, in a high-traffic public environment.
- Monitored systems in real time and resolved hardware, software, and connectivity issues to prevent service and security disruptions.
- Managed digital systems to ensure reliable, uninterrupted operation across the event network.

PROJECTS

AssetsPro Enterprise IT Asset Management & Access Control Platform

2026

- Built a full-stack internal asset-management platform for Malomatia (React/Vite, Node.js/Express, PostgreSQL) to give the security team centralized visibility over hardware and software assets.
- Implemented role-based authentication and backend-enforced admin authorization to restrict sensitive asset data to approved users only.
- Built audit logging across all record changes to support accountability and security review of administrative actions.
- Built a real-time lifecycle notification system to flag expiring software licenses and critical assets before they become compliance or security risks.

SkillsPro Internal Access-Controlled Skills & Certification Portal

2026

- Designed and built an internal certification-tracking portal for the NSOC team (React, Node.js/Express, PostgreSQL) to monitor staff readiness on security certifications.
- Implemented admin-managed user provisioning with forced password resets on first login, replacing manual database inserts and reducing credential-handling risk.
- Built certification and skills tracking dashboards to help the NSOC team monitor coverage of key security competencies across staff.
- Added a read/unread notification system and global search and enforced access boundaries so users only manage their own records unless granted admin rights.

Autonomous Vehicle Desert Simulation Framework (UREP)

Sep 2025 – 2026

- Built a network-integrated simulation system (Unity + Python) communicating over TCP/IP to model real-world network behavior.
- Simulated latency, packet transmission, and induced system failures to evaluate network resilience and fault tolerance under adverse conditions.
- Assessed system reliability and performance degradation patterns relevant to maintaining stable enterprise network connections.
- Applied core networking and secure system-integration concepts used in production enterprise environments.

ACADEMIC HISTORY

Bachelor of Science in Information Technology
University of Doha for Science and Technology (UDST)
2022 – 2026

High School Diploma
Pakistan International School
2020 – 2022

CERTIFIED COURSES

Palo Alto Networks Cybersecurity Academy

- Network Security Fundamentals (2023)
- Cybersecurity Foundation (2023)

AWS Academy

- AWS Academy Cloud Foundations (2024)

Fortinet

- NSE 3 – FortiGate 7.6 Operator (2026)
- NSE 1 – Fundamentals in Cybersecurity (2026)

Vectra

- Vectra Presales Security Engineer (2026)

Cisco Networking Academy

- Industrial Networking Essentials (2026)
- Network Technician Career Path (2026)
- Ethical Hacker (2026)
- Data Science Essentials with Python (2026)
- Cyber Threat Management (2026)
- Linux Unhatched (2026)
- Introduction to IoT and Digital Transformation (2026)
- Introduction to Modern AI (2026)
- Introduction to Cybersecurity (2026)

TECHNICAL SKILLS

Network Security: Firewall management, NSOC monitoring, threat detection, incident analysis, access control.

Networking: TCP/IP, DHCP, DNS, VLANs, Subnetting, Routing & Switching, OSPF, Wireless Networks

Systems & Identity: Windows Server management, Active Directory, role-based access control, DNS/DHCP

Cloud Security: AWS EC2, S3, IAM, VPC, virtualization

Application Security: Secure authentication, RBAC, audit logging, secure hosting & deployment (Apache)

Programming: Python, C/C++ (basic), JavaScript (basic), Java (foundational)

Web & Backend Development: HTML, CSS, JavaScript, React, Node.js/Express

Databases: SQL, PostgreSQL, MySQL

Tools: Cisco Packet Tracer, Wireshark, VMware, VirtualBox, AWS Console, EVE-NG

Soft Skills: Communication, teamwork, problem-solving, tutoring, documentation

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

Mental Health Ambassador

Jan 2023 – Mar 2026

University of Doha for Science and Technology (UDST)

- Conducted 10+ seminars for 100+ students using digital tools and AV systems, managing the underlying AV/IT setup for each session.
- Delivered structured presentations and coordinated events via institutional platforms, building communication skills directly transferable to security awareness training.
- Strengthened stakeholder communication and problem-solving skills are valuable for explaining technical and security issues to non-technical audiences.

LANGUAGES

English Fluent **Urdu/Hindi** Native **Punjabi** Native **Arabic** Basic communication
